Winterburn: E Pinchbeck, G J Welbourn.

Keep Hills: E Tattersall.
Clymont: Ed Willette.
Tonahawk: A Wakelin.

Hockey Pictorial, 2d Edition.

The second edition of the Hockey Pictorial is on the market, more complete and up to date than the original edition, which was received with such acclaim by followers of the great winter sport. Most favorable comments have been passed upon the publication by sport writers the continent over, and the general opinion as expressed by players and scribes is that no more comprehensive or handsome book in the sporting line was ever printed. A feature that should possess a marked appeal not only to puck-chasers of the present, but to old timers, are the many group pictures of champion teams, dating back to the early history of hockey. The new edition not only contains the history of hockey in Canada, but the history of the game in the United States also, with 300 handsome engravings of Canadian and American teams, and is right up to the minute in every respect. Any further information pertaining to the book can be obtained by writing to the Hockey Pictorial, 84 Victoria St., Toronto, Ont.

Calendar.

Jan. 1—Hockey game at Spruce Grove.

9—Concert and dance, Blueberry School.

16—Inga M. D. Court of Revision.

Card of Thanks.

We wish to thank our friends and neighbors for all they done for us during the sickness and death of our dear little son and brother.
Mr. and Mrs. Liebert and Family.

To Help the Widowers

An article going the rounds of the press at the present time says one of the resolutions taken up at the recent convention in Calgary of the Alberta Municipal Districts was the following from the M.D. of Subur No. 514, which reads:

Whereas the mothers who receive support under the Mothers Allowance Act in some instances refuse to marry widowers, as they believe that the husband may not be able to support them so well as they are now supported by the municipality. The widowers, unable to get married, are compelled to do the housework, and have no time to work on the farm, and are getting into debt and losing their property:

Therefore be it resolved that the Mothers Allowance Act be amended so that the council of this municipality be allowed to decrease the allowance to any mother upon the proof that she refused to marry a widower, for the only reason that she does not think that the husband will be able to support her so good as she is supported under the Mothers' Allowance act.

LOCAL NEWS.

Ed Dimp, Morinville, was a week-end visitor at the Blean home.

Miss Rose Rivest, Morinville, was a holiday visitor at her home here.

Mr Henry Schlitt left last week on a vacation with friends at Portland, Ore.

The Misses Muriel and Sybil Robertson of Edmonton were visitors with Mrs Oatway during the holidays.

Miss Maud Davis of Edmonton was a week-end visitor at her home here.

Mr C E Clarke was up from Red Deer over the week end.

Mr and Mrs Kelly spent Friday last with friends in Edmonton.

Mr H O Terwilliger, the well-known farmer north of town, is arranging to move to Vancouver, to engage in the garage business.

Mr Chester A Kimmerley is leaving Stony tomorrow, Friday Jan. 2, for Chicago, to enter the Coyne Electrical College.

Mr Geo Wolf left Friday on a visit with friends at Holden.

Services were held in the local Lutheran Church by Rev E Eberhardt on Sunday last.

Agent Meyer has this week received a car of the famous Mercoul coal, from the Coal-spur line. Those wanting a load should send in an order at once.

The big inner safe of the old bank in town has been shipped by Mr Michael to the head office of the Bank of Montreal at Calgary.

The principal indoor sport now is stock-taking. Another indoor amusement is guessing when the skating rink will be open to the public.

Inga Councillors meet in Stony Plain Friday Jan. 16.

Sunday morning's train from the East was about nine hours late.

Will the party who removed a parcel containing a gold watch from under our telephone kindly return same at once?—Michael's Hardware.

At the local Court on Saturday last the principal case was that between two Comet farmers over the alleged illegal impounding of four pigs by one of the farmers. Defendant was represented by Mr James Malloch, the well-known attorney, while Solicitor Lundy appeared for the complainant. The session lasted over four hours, and a varied assortment of evidence was produced during this time some of which had a direct bearing on the case in hand. At the conclusion, the accused was fined \$1 and costs. There is the possibility of an appeal being lodged.

Dr Hamilton, dentist, will be in Stony Plain on Jan. 2, instead of his regular day that week.

WISHING

A BRIGHT AND
PROSPEROUS NEW YEAR
TO ALL.

CUTICURA HEALS PAINFUL PIMPLES

On Face and Shoulders.
Itched and Burned.

"My trouble began with a rash of pimples on my face and shoulders. The pimples were hard and red and feasted and scaled over. They were very painful and itched and burned so that I could not sleep nights. I was ashamed to go anywhere my face was so disfigured. The trouble lasted about four and a half years.

"I began using Cuticura Soap and Ointment, and after using three cakes of Cuticura Soap and two boxes of Cuticura Ointment I was completely healed." (Signed) Miss Myrtle A. Westover, Bolton Centre, Quebec.

Rely on Cuticura Soap, Ointment and Talcum to keep your skin clear. Sample Box Free by Mail. Write for it. Cuticura Soap, Ointment and Talcum. Write for it. Cuticura Soap, Ointment and Talcum. Write for it.

WORLD HAPPENINGS BRIEFLY TOLD

The Right Hon. Sir George William Buchanan former British ambassador to Rome and Petrograd, died in London, Dec. 20.

By unanimous vote the British Columbia Legislature has approved the anti-Oriental resolution of Hon. William Sloan, minister of mines.

Reports reaching Paris are to the effect that Germany is persisting in arming, contrary to the peace treaty provisions.

Seven women law students are to be called to the English Bar shortly. These will bring the number of women barristers to 41.

At a special general meeting of shareholders of the Molson's Bank at the head office, Montreal, the sale of that institution to the Bank of Montreal, was formally ratified.

Employees numbering 2,000 of the largest shoe manufacturing firms in Montreal have signed a petition urging upon the Federal Government to increase the shoe and boot import tariff.

A wireless ticker, which can successfully send wireless messages directly, through the use of varying currents, is said to have been invented by a German and Englishman working for Huth and Company, Berlin.

On account of the Albanian insurrection, the Jugo-Slav Government has decided to close the frontier. At the same time, it has ordered the disarmament and internment of all persons from the belligerent camps crossing the frontier.

We are not spending any more money on our army and navy together than England is spending on her navy alone," Jules Jaserand, retiring French ambassador to the United States, told guests at a farewell banquet in his honor.

"Dolly," the pet leopard of Manolore Pozde, French actress, caused a near riot in a London theatre when she appeared on the stage during a tense moment of the melodrama, "Grim Night." The orchestra died to a man.

Wembley Deficit is Now \$1,700,000. The British Empire Exposition at Wembley will have a lease on site for another year. The backers of the exposition hope to recoup some of their losses by continuing the exhibits. The deficit now is \$1,700,000.

Death of Sir William Ingram. Sir William Ingram, son of the founder of the Illustrated London News, died in London recently.

Deaths from Cancer. Heavy Toll is Exact in the United States. Deaths from cancer increased in the United States in 1923, while the fight against tuberculosis made progress.

A total of 56,764 deaths were reported to the Census Bureau as having resulted from cancer last year in a registration area composed of territory containing 87 per cent of the total population, this representing an increase of 5,616 deaths over 1922. The rate per 100,000 population was 89.4 against 86.8 in 1922.

In the same area tuberculosis caused 49,792 deaths against 50,452 in 1922. But the rate per 100,000 decreased from 97 to 92.6.

Hooks On Airship Going Full Speed

Feat Accomplished at Belleville by Small Type Plane

The double feat of an aeroplane hooking itself onto an airship while both were in full flight, and then forcing itself to sail away again, was accomplished for the first time at Scott Field.

The ship used was the army dirigible TC-3, and the plane was a Sperry Messenger, a small type. A metal hook attached to a frame over the motor of the plane was used to catch onto a small trapeze, swinging from cables slung under the bombing rails of the ship. The feat was accomplished at an elevation of 1,500 feet.

Britain's Huge Dirigible

Air Ministry Gives Out Details of World's Greatest

First details of the world's greatest airship, to be built by the British air ministry at Cardington, Bedfordshire, are now disclosed. The new airship will be known as the R-101, and will probably be completed by the end of 1926. It will be the first steel airship, the main part of the structure being of stainless steel, with steel propellers. Cubical capacity will be about five million cubic feet, twice that of any airship yet constructed. It will be able to accommodate 100 passengers.

Grain Commission Report

Will Be Exhaustive Survey of All Phases of Grain Marketing

The final report of the Royal Grain Enquiry Commission is practically completed and after revision will be printed and presented to the Federal Government.

It is understood the report will consist of about five hundred pages, or about 150,000 words, of an exhaustive survey of all phases of the marketing of grain.

The commissioners' final report will probably be tabled in the House of Commons when Parliament meets.

HEART TROUBLE SHORTNESS OF BREATH

Mrs. Geo. E. Bowman, Morrisburg, Ont., writes:—"I am writing you a few lines to let you know of my experience with Milburn's Heart and Nerve Pills."

"Two years ago I became very poorly with my heart and nerves and whenever I took the least little bit of exercise my heart would start to jump and flutter. I could not walk upstairs without having to sit down and rest before I was halfway up, on account of my heart becoming so short."

I commenced taking MILBURN'S HEART AND NERVE PILLS

and in no time I felt a great improvement and can now heartily recommend them to all those who are troubled with any affection of the heart."

H. & N. Pills are for sale at all druggists and all stores; put up only by The T. Milburn Co. Ltd., Toronto, Ont.

California Volcano Active Mount Lassen, near Westwood, Cal., the only active volcano in continental United States, began an eruption of smoke and gas recently. Residents of Westwood declare if the largest eruption of the mountain since 1915.

For Catarrh—It is one of the chief recommendations of Dr. Thomas' Electric Oil that it can be used internally with as much success as it is outwards. Sufferers from Catarrh will find that the Oil when used according to directions will give prompt relief. Many sufferers from this ailment have found relief in the Oil and have sent testimonials.

Deaths from Cancer. Heavy Toll is Exact in the United States. Deaths from cancer increased in the United States in 1923, while the fight against tuberculosis made progress.

A total of 56,764 deaths were reported to the Census Bureau as having resulted from cancer last year in a registration area composed of territory containing 87 per cent of the total population, this representing an increase of 5,616 deaths over 1922. The rate per 100,000 population was 89.4 against 86.8 in 1922.

In the same area tuberculosis caused 49,792 deaths against 50,452 in 1922. But the rate per 100,000 decreased from 97 to 92.6.

Anemic Girls At Business Gain Strength on SCOTT'S EMULSION

British Battleships Will Visit America

Governors Have Been Instructed to Extend Usual Courtesies

Four British warships, with a British vice-admiral, are expected to visit the U.S. early in January. Sir Esme Howard, British ambassador, informed the state department.

H.M.S. Calcutta, bearing the British commander-in-chief of the North American and West India station, will visit New Orleans, accompanied by H.M.S. Capetown, from January 5 to January 10.

The British cruisers Curlew and Constance will visit Key West from December 31 until January 9.

The governor of Louisiana and Florida have been requested to extend the usual courtesies to the British warships.

Wheat Shortage

Decrease 440,000,000 Bushels Is Estimated

A decrease of 440,000,000 bushels in the estimated world wheat crop, compared with last year, is indicated in reports made public by the U.S. department of agriculture, which place the crop at 3,200,000,000 bushels. The average five-year pre-war total was 3,740,000,000 bushels.

The most important reduction shown is in Canada, where the crop is placed at 200,000,000 bushels below, and in Argentina with a reduction of 60,000,000. The European crop, with the exception of Russia, is reported 180,000,000 bushels below last year, and nearly 500,000,000 under the average.

Canadian winter wheat seedling area this year totalled 832,000 acres, or 60,000 acres above the 1923 figures.

The Drug Problem

Experts Urge Close Watch on the Cocaine Trade

The sub-committee of experts of the opium conference at Geneva, which is dealing with various technical aspects of the drug problem, drew up a preliminary report on the general question of cocaine and coca leaves. The experts agreed that they could not limit the growing of coca leaves because the plant often grows wild. But they recommended that all governments exercise strict control over the traffic in them by means of export and import certificates.

Licenses For Radio

Large Increase Is Shown in Number of Licenses Issued Last Year

A total number of 69,588 receiving licenses for radio sets have been issued during the first eight months of the fiscal year April 1 to November 30, 1923, according to an announcement made by the radio branch of the department of marine and fisheries. This shows a vast increase of \$9,848 in the number granted as compared with the same period last year.

In Old Madrid Master Rodriguez Madara, one of the most famous elementary school teachers in Spain, has declined to teach classes beneath electric lights.

He says the glare of these lights is ruinous to pupils' eyes and that they also serve to distract their attention from their studies. He has demanded that candle light be restored in his class rooms.

Time Has Tested It—Dr. Thomas' Electric Oil has been on the market upwards of fifty years and in that time it has proved a blessing to thousands. It is in high favor throughout Canada and its excellence has carried it far beyond the seas. If it were doubled the price it would be a cheap liniment.

Japan Price For Oxford Prince Yauhuilo, second son of the Emperor of Japan, will sail for Europe on May 11, to spend two years in Oxford.

England for four years. Social problems will be his principal study.

PATENTS

The value of a patent depends on the experience of the patent attorney. We offer over twenty years' experience during which time thirteen thousand patents were handed out.

CARON & CARON, PATENT ATTORNEYS OTTAWA, ONT.

Success With Alfalfa

By James D. McGregor, Glenora, Mont. Stock Farms, Brandon, Man. (Part 4—Continued)

In Western Canada two crops of alfalfa may be cut each season, but the second crop must not be cut too late as it is necessary that the plants attain a fairly good growth after the second cutting in order to catch the snow and give it strength to carry it self through the winter.

Alfalfa hay is no harder to cut and handle than other hays; in fact, the silfer stems make it somewhat easier to dry and it is less silky than the clovers to be damaged in appearance by light rains or heavy dews. It has been found by analysis that the feeding value of the hay is greatest at the time when about the first one-tenth of the blooms have appeared. The hay becomes woody quite rapidly as it gets older, and the digestibility of it naturally decreases.

The starting of tillers or new shoots at the crown means that the old stems and leaves are no longer growing, and should be cut off. By cutting late, after the alfalfa is in full bloom, there is a loss on two crops—the late cut hay is stony because the leaves have fallen off, and woody because it is too ripe; cutting the new set of shoots delays the next crop, and allows the weeds to get a start.

The leaves are much more easily saved if the hay is cut early, as they do not drop so readily. When the alfalfa plant is mature the leaves drop off naturally, the same as from grass in the fall. Late cutting and careless handling often reduce the value of the crop one-half. Cut early, just as the new shoots are well started, getting the sickle high so as to avoid cutting the new shoots.

The leaves of alfalfa contain nearly four times as much protein as the stems, a ton of dried alfalfa leaves containing as much protein as 2,300 pounds of bran; hence every effort should be made to cure the alfalfa in such a way as to save all the leaves. The method of curing will vary with the condition of soil, ground and weather.

When alfalfa has made a slow growth and the ground and weather are dry at time of cutting, there is no difficulty in curing. Often, under these conditions, it is safe to rake and cure alfalfa after mowing, and stack a few hours after the alfalfa has been put in the windrows. When alfalfa has made a rapid growth and is rank and succulent and the weather and ground are damp, the problem of curing is a difficult one. It is easy to dry the leaves, but the stems will contain much moisture after the leaves are dry.

If the weather is very unfavorable and continuing wet so that the hay cannot be dried, it may be stacked quite green; in fact, it is probable that the hay will be damaged much less by heating in the stack than by molding in the shock or windrow. When stacked green, the hay may turn a dark brown, but it is related by the stock and apparently has lost very little of its feeding value. There is some loss from heating, but the palatability and digestibility are improved.

Soft coars are difficult to eradicate, but Holloway's Corn Remover will draw them out painlessly.

Former Riel Suppressor Dies In Winnipeg

Andre Nault's Action Started Trouble Which Led to Rebellion

Andre Nault, who was one of Louis Riel's supporters in the troublesome days of the Red River settlement, died in Winnipeg, Dec. 17, at the age of 85. He was born in 1839 at Point Douglas.

The far-reaching strife along the Red River in 1850 was precipitated when Mr. Nault discovered a number of surveyors measuring his land. He immediately notified Louis Riel who ordered the government servants off the land. This action started the trouble between the French Canadian frontiersmen and the authorities which led to rebellion.

"It was not a rebellion and I do not wish it to be called so," Mr. Nault consistently maintained. "All we desired was just justice, our rights, that the Dominion Government should consult us in reference to the nature of the government in the colony."

There are anywhere from 75,000,000 to 1,000,000,000 million stars, astronomers say.

Minard's Liniment for Sprains and Bruises

in the Kitchen

Try a small portion of Gillett's Pure Flake Lye in the dishwasher when cleaning greasy pots and pans. It will save you much hard labor.

MADE IN CANADA

SUNDAY SCHOOL LESSON

JANUARY 4

CHRIST'S TRIUMPHAL ENTRY

Golden Text: Blessed is the King that cometh in the name of the Lord. Luke 19:35.

Lesson: Luke 19:29-44.

Devotional Reading: Psalm 118:21-29.

The Text Explained and Illumined. Preparations for Christ's Triumphal Entry of Jerusalem, verses 29-35. Jesus and His disciples were approaching Jerusalem. When in the neighborhood of Bethphage and Bethany, on the Mount of Olives, Jesus sent two of His disciples ahead to make preparations for His entering Jerusalem. A few days later it was Peter and John who were sent in advance to prepare for the Passover feast; perhaps to them was also assigned this earlier duty. From the village Jesus bade them bring a colt that had never been ridden, which they would find tied there. Should the owners of the colt object, the disciples need only say, "The Lord hath need of him."

"Let the ass stand as the modest representative of the material value of the world." The Lord has need of them all. His purpose for the race can only be fulfilled through these material aids yielded to Him in willing consecration. The farms and the mines, the stores and the shops, the railroads and the steamships, must yield to the mastery of His spirit and be adorned with reference to the high ends of human well-being which He held steadily in view? (Dr. C. H. Brown).

IRELAND SENDS STRONG PROTEST TO THE LEAGUE

Geneva.—The delicate problem of relations between the component parts of the British Empire has been raised again by Ireland throwing down the gauntlet of diplomatic revolt against the Mother Country. Ireland has added to the strenuous schedule of Christmas events already before the League, through the Albanian and German problems, by notifying the Geneva peace organization that she entirely disavows from the views of Great Britain denying Ireland's right to register the famous Anglo-Irish treaty.

Ireland, in diplomatic phraseology, told the League that she does not desire to pursue the controversy with Great Britain, yet makes it perfectly clear that she cannot be restricted as to League prerogatives by any limitation imposed by Downing Street.

Ireland's note has created an extraordinary interest in the League circles, because it is believed here that it may be the start of similar movements by other parts of the Empire, especially Canada and South Africa.

The question involved is held to be far deeper than settling as to whether the Irish treaty is an international instrument capable of registration with the League. Ireland's move involves the entire relations of the various units of the British Empire with the League, and, in the judgment of officials in Geneva, may settle how much independence of action can be expected from the colonies and permitted by the League itself.

Trotsky Is Reviled

By Soviet Leaders

War Chief Blamed For All Failures Of Bolshevik Regime

Moscow.—Although Trotsky now is out of the political arena and far removed from the bitter party strife of in and without the Communist party, Moscow, attacks upon him from within continue unceasingly. No man in public life, even during the heat of bitter election campaigns, has had to face such a merciless fire of censure and condemnation as has been directed against the Soviet war chief for the last six weeks. All the sins and shortcomings and failures of the Bolshevik regime have been visited upon his head.

Although he is in admittedly poor physical shape, no note of sympathy is heard for the man who hitherto has ranked as next in fame and power to Lenin.

Organization Growing

Saskatchewan Grain Growers Report Greatly Increased Membership

Regina.—Sixty-six locals have been organized or re-organized during the membership drive staged by the Saskatchewan Grain Growers' Association, according to information received at the central office last night.

It is not anticipated that complete results will be known before the annual convention meets, but officials state satisfactory progress is indicated in the increasing volume of fees pouring into the central office.

Existing locals' report large increase in membership and commitments have been appalled to conduct local membership campaigns. Several new locals are lined up for 1925.

Effort For Peace

London.—In an effort to promote world-wide peace, "The Day," a weekly newspaper, has offered to issue copies of the paper free of charge on the streets whenever it is possible to go to press without printing any war news. So far all copies of the paper have been sold at a price, however.

Premier To Visit Quebec

Quebec.—Great interest is being manifested here in the forthcoming visit of the Rt. Hon. W. L. Mackenzie King, who will visit Quebec, January 15, accompanied by a number of his Cabinet ministers.

Approves Appointment

London.—His Majesty King George has given his approval of the swearing in of Chief Justice Agass, of Canada, as a member of the Privy Council.

W. N. U. 1557

Says Anglo-German Commercial Treaty Signed

Paris.—The suggestion that the commercial negotiations between France and Germany are dragging because the German and English manufacturers have already concluded an alliance, is put forward by Lucien Chassagne, chief editor of Le Journal. He points out that the Anglo-German commercial agreement was signed in three days practically without discussion, while the French-German negotiations have made little headway after weeks, and now the German delegates announce they are going back to Berlin, not to return until January 8.

Germany Wants Exceptional Position In The League

Wants Heavy Reduction Of Her Neighbor's Armaments

Geneva.—Germany's note to the League of Nations, touching on the question of that country's joining the League, was sent to all the members for their comments or suggestions, and is being discussed here with the keenest interest.

The note, which shows that Germany desires an exceptional position as a member of the League because of her lack of armed strength, is regarded in some quarters as an appeal to the League as a whole over the head of the council, which failed to give Germany satisfaction in previous direct negotiations.

The opinion is expressed by some that Germany is determined to obtain a heavy reduction of her neighbors' armaments, especially of France and the "Little Entente," before subscribing to the Geneva peace protocol, which all admit must be revised. Others believe that Germany probably fears the possible transportation of troops over her territory for use against Russia, with whom she is especially desirous of remaining on good terms.

Police Capture Men For Nanaimo Theft

Detectives Trapped Six of the Eight Men Accused

Seattle.—With a single cast of the net over Western Washington, Canadian and American officials and detectives trapped six of the eight men accused of the spectacular holdup and \$40,000 robbery December 32 of the Royal Bank of Canada at Nanaimo, B.C. The two most noted of the prisoners are Ross C. Watson, until recently a Seattle police detective, dismissed from the department a few weeks ago and charged with complicity in the \$25,000 bank robbery here, August 8; and Clarence H. (Dick) Shively, former Seattle policeman, convicted and sentenced to two years' imprisonment for drug violation, and awaiting trial in connection with last year's Bank of California bank robbery here.

Sending Note To Germany

Communication to Berlin Will Give Allied Views On Disarmament London.—It is possible that the Council of Ambassadors, after considering an interim report from the Allied Ministry authorities on armament conditions in Germany, will send a communication to Berlin on the subject giving the allied views. It was learned in British official circles.

The two aspects of the German armament situation that are giving the greatest concern are said, in official quarters, to be the alleged organization of the German police along lines that make it, in reality, a sort of army; and the allegations that the clandestine manufacture of machine guns is going on.

Clemency As Gift

Washington.—Extension of executive clemency as a Christmas gift by the President was limited this year to one person, John Rohrer, of San Jose, Cal., whose life sentence was commuted to 20 years. Rohrer thus becomes eligible for parole upon immediate application.

Cattle Disease Spreads

Brussels.—The foot and mouth disease among cattle is still spreading in Belgium. There are cases in 3,534 farmyards scattered in 953 villages.

The Hanover Vulture

FRITZ HAARMANN

vampire mass-murderer, who, together with his accomplice, Hans Graw, was sentenced to death by a German judge for the murder of 26 persons.

Sees Vancouver As Greatest Pacific Port

Has Left Behind All Cities Excepting San Francisco

St. John, N.B.—Within the lifetime of many present, the world would see Vancouver attain to the commercial supremacy of the Pacific coast and become the greatest ocean port on that seaboard, declared Hon. H. A. McKeown, chairman of the Canadian Board of Railway Commissioners in addressing the New Brunswick branch of the Maritime Commercial Travel Association here. Hon. Mr. McKeown, who has just returned from the west, said Vancouver had already left behind all cities, including Seattle, with the exception of San Francisco, and was "hot on the tail" of that city.

Institute Proceedings Against Paris Papers

Government Takes Exception To Articles About Alleged Communist Plot

Paris.—Minister of Justice Renauld has instructed the Paris courts to institute proceedings against the afternoon newspaper La Liberté for the publication of false news.

The articles which the Government takes exception to were concerned with the exposure of an alleged Communist plot to capture the city of Amiens and an editorial statement that the Government had mobbed tanks and machine guns, placing them in various suburbs, with a view of repelling an expected Communist reprisal.

Criticizes Equipment Of U.S. Air Force

Rear-Admiral Moffatt Says Bulk Of Planes Are Obsolete

Washington.—Only 224 of the 840 planes of all kinds in possession of the United States navy could be used effectively in case of war, Rear-Admiral Moffatt, chief of the Bureau of Aeronautics, testified before the special aircraft investigating committee of the House. About 500 airplanes are obsolete, he said, and even the 224 which could be used effectively are becoming out of date.

Series Of New Bills

Issue Has Just Been Put Out By Imperial Bank

Regina.—As a Christmas issue the Imperial Bank of Canada put out a series of new bank bills. The idea of the head office was that a new issue would come appropriately a couple of days before Christmas to accommodate those who wished to give a gift bank note as a present.

The \$5 bills of the new issue are green with the cut of the president and general manager of the bank on the face of the notes. The \$10 bills are of a bluish shade with the same cuts. The \$20 bills are brownish with a cut of the president only.

G. A. Clements Dies

Vancouver.—Sergeant-Major G. A. Clements, R.C.E., one of the best known instructors in military engineering in Canada, is dead here. He enlisted in the Royal Engineers in Chatham, England, in 1892.

Ibanez Is Ready To Fight A Duel

Mentone, France.—"Alfonso and Primo De Rivera, whom I have attacked in my writings, are the only two men I will fight in a duel," Victor Ibanez, the Spanish author, made this declaration when informed of the numerous challenges emanating from Spain from various personages mentioned in his book who are defectors of seeking satisfaction at arms. "I need not fight all these people to prove my courage," Ibanez continued. "I have already fought nine duels, either with pistols or swords, and two of my opponents were seriously wounded, one of them being at the point of death for several days."

Air Mail Pilot Killed

Leaped From Plane But Parachute Failed to Work

Chicago.—Trusting his life to a few yards silk, composing his parachute after his airplane failed to function in a blinding snowstorm, Clarence Gilbert, air mail pilot, leaped into space in the clouds over the little town of Kaukaile, Ill., and lost his gamble with death.

His body, with strands of the parachute which failed to operate still attached to his belt, was found near Kaukaile shortly after farmers had found his wrecked plane with its burden of mail, after a 15-hour hunt, along the air mail route.

His death marked the first fatal accident to that little band of transcontinental blizzards who, since July, have been winging their way across a continent in good weather and bad, with their cargoes of mail.

Ottawa Post Office Speeds Up Business

Had Scheme This Year For Handling Christmas Rush

Ottawa.—The Ottawa post office took over the licking of Christmas stamps. Under the scheme, one handed the parcels to a clerk, who weighed and called out the amount of postage for each package to a second clerk, who actually manipulated a cash register. A slip bearing the amount of postage was given out. One paid the postage in cash and went his way. Inside, a staff of employees affixed the proper stamps. The idea was to speed up the Christmas queues.

Conan Doyle Starts Campaign

Aims to Convert London and the World to Spiritualism

London.—Grounding their appeal on the assertion that Christ was the greatest psychic ever known and that his apostles were chosen for their psychic powers, London spiritualists led by Sir Arthur Conan Doyle, have begun a campaign to convert London and the world to spiritualism.

Co-operating with Sir Arthur is Dr. G. Vale Owen, the famous spiritualist pastor. Between them they hope to waken the fashionable west end of London to the worth of spiritualism as a cure for the evils of the world.

Left Tickets That Won Lottery Prizes

Impoverished Widow of Spaniard Will Have About \$140,000

Madrid.—A dead man was a goodly portion of the annual Christmas lottery prizes. He was Senor Quintana, and he left behind in his effects two lottery tickets which captured prizes totalling about \$140,000.

Just before he died, Quintana's house was robbed, and, without funds, his widow and children were facing a cold and hungry Christmas.

MacDonald Leaves For Jamaica

London.—Ramsay MacDonald has left for Jamaica on his first real vacation since his resignation as premier. He will return to England in time for the resumption of Parliament early in February.

New Air Record

Paris.—The Aero Club of France has officially ratified the new world's speed aeroplane record of 448.71 kilometres an hour made by Adolphe Ploerstin Bonnet at Istres, Dec. 11.

TO TAKE STEPS TO STIMULATE EMPIRE TRADE

Ottawa.—While no definite official advice has yet been received, it is assumed, in official circles here, the Baldwin Government will take steps shortly after Christmas to call together the proposed Imperial Economic Committee. The committee will consider methods of stimulating Empire trade, apart from preferential tariffs. So far as the marketing of foodstuffs and agricultural raw materials originating in the British Empire is concerned, three principal methods of assistance have been suggested:

- (1) Import licenses.
- (2) Subsidies.
- (3) Stabilization of prices.

Reports from London that the Baldwin Government had decided on a system of import licenses are not confirmed by official advice.—The assumption here is rather that the whole question will be referred to the Imperial Economic Committee for consideration. It is pointed out, however, that the system of import licenses was abandoned by the food and material committee of the Imperial Economic Conference last year, which met under the chairmanship of Sir Philip Lloyd George, President of the Board of Trade, and the committee did not recommend a system of prohibition and licenses.

South African Visit - Valuable To Empire

Sir George Foster Declares Trip Productive Of Good

Ottawa.—Back from their trip to South Africa, with the other members of the Empire Parliamentary group, Sir George and Lady Foster expressed themselves delighted with their many and varied experiences. They have covered over 30,000 miles within the last five months, including 8,500 miles by train in South Africa and 3,000 by automobile.

"On the whole the visit has undoubtedly had a very excellent effect in stimulating a feeling of kinship and common interest between South Africa and the other parts of the overseas dominions and the Empire, giving to both the visitors and the South Africans themselves a better understanding of the problems of the Empire as a whole," declared Sir George.

Saskatchewan Schools

Increased Attendance Is Shown In Rural and Urban Districts

Regina.—Rural, village, town and city schools in Saskatchewan showed increases in enrolment and the average daily attendance during 1923, according to the departmental annual report just issued.

Elementary schools in the province had an enrolment of 137,968 pupils with an average daily attendance of 105,873. This compares with an enrolment of 178,214 and an average daily attendance of 115,252 the preceding year.

Province school grants during the year aggregated \$1,928,812, of which \$1,757,029 was for elementary schools and \$191,783 for secondary and vocational education.

Coal Gas Penetrated Walls

Eleven Menstruals Almost Killed By Fumes From Next Door Furnace

Montreal.—Coal gas seeping through the walls nearby brought death to eleven persons asleep in beds in dwellings in Rosemont. The victims are members of two families, eight of them children, the oldest of whom is seven years.

Police investigation shows the gas came from a building under construction next to the dwellings. A furnace in the partly constructed building had been lighted and the vents closed. The gas having no other outlet, penetrated the walls.

Tell Of Disease

Washington.—Death rates from both typhoid fever and diphtheria in the United States during registration are decreased during 1923, according to figures made public by the Census Bureau. Deaths from typhoid in 1923 totalled 4,635 against 6,591. Deaths from diphtheria in 1923 totalled 17,157 against 17,182 in 1922.

"Barren Lands" of North Are Now Found To Be Suitable For Cultivation

Although nearly one-sixth of the area of the Dominion is included under the name of the "Barren Lands," there has been very little authentic information available about their nature and possible resources. Most of the exploration throughout these regions was carried on in the earlier days—from 1770 to 1854—in the way of various overland journeys in conjunction with Arctic expeditions by sea, searching for a northwest passage to the Orient.

From the close of that period of exploration to the present day, over a span of nearly a century, with the great strides in settlement and the development of transportation and economic machinery in general, little has been done to reconsider the possibilities of these regions. The light of recent-day conditions has been to obtain first-hand information about the country, and at the same time lay down a skeleton system of survey for all possible future development. Surveys, control traverses and geological surveys were extended during the past season through a series of valleys lying to the north and east of the main part of Great Slave Lake. This work was carried on by G. H. Blanchet, D.L.S., of the department of geographical survey of Canada, the department of the Interior.

The waterways followed consist of a series of large lakes draining to Great Slave Lake which lie in the great plain region of northern elevation, and are generally sublevel topography. It was observed that the country became less rough toward the north and east, and that the accumulation of soil was greater with the earlier estimates of improvement in the amount and variety of the vegetation. The name "Barren Lands" as applied to the greater portion of this country is a misnomer. It is true that trees do not grow beyond a certain line, and to the north and east of this line areas of barrenness exist where soil is either lacking or too coarse for ordinary plant life, but in the greater portion of the country a variety of shrubs and mosses cover the hills and grasses flourish in the swampy valleys.

Canada Needs Capital

More People and More Capital Needed
If Dominion Is to Forge Ahead
Canada must get more capital and more people if she is to survive and progress, and that must be the guiding policy with that of Great Britain, declared Dr. Stephen Leacock, professor of political economy at McGill University, in an address at Montreal.

Prof. Leacock said there was no need to disguise the fact that at the present time the country was not in a satisfactory condition. Statistics were not needed to tell the people that the country's lifeblood was being drained by emigration. The greater portion of those who had left in the last two or three years were young men, the best blood of the Dominion.

His Only Extraneous
Old Hen Roddy, from the back of the low, is fond of bawling out his warnings, thriftiness, by virtue of which he has accumulated a fairly substantial bank account.

"You're very careful about your expenditures, aren't you, Old Hen? The village schoolmaster says so."

"Yes, perfesser, I am. I don't want this way. I don't want to be ever spent but one quarter of the day foolhardiness. That was one Christmas time when I let the boys have a wild party."

"Reichsleichenbahngesellschaft," German railroad, are now in the hands of a company called the Reichsleichenbahngesellschaft. They haven't much speed on the German lines, but you wouldn't want to be run over by a thing like this. I would not."

A Cure for Sleeplessness
By adding about two or three hours of sleep each night, you may fancy about 90 per cent of the sleep in this country would be disposed of. —Houston Post.

W. N. O. 1567

Alberta Will Test

Tuberculosis Serum

Prevention of Disease in Cattle Discovered by Pasteur Institute

What will probably prove to be one of the most far-reaching and effective steps ever taken by the Alberta department of agriculture for the improvement of livestock in the province has, consequently, following extended negotiations with the Pasteur Institute, been agreed upon by Hon. Geo. Howley, minister of agriculture, by the arrival from the Pasteur Institute at Paris, France, of a sample of the Calmette culture, evolved by Prof. Calmette of the above institution, for the formation of young calves against tuberculosis. This culture has been turned over to the laboratory at the university for multiplication, so that a quantity of the culture can be obtained for use in making tests in the province.

Alberta is very fortunate in having been able to secure the culture, and the fact is that this is the only place in the American continent to secure the culture this far.

Total Yield Of Grain

Revised Estimate of Crop Yield of Three Prairie Provinces

Revised estimates of the crop yields of the three prairie provinces were released today by the Northwest Grain Producers' Association, Winnipeg. The total wheat crop area grown at 247,146,000 bushels, which does not vary greatly with the earlier estimate of the association. Oats were shown at 289,114,000 bushels, barley at 54,856,000 bushels, rye at 2,255,000 bushels, flax at 7,323,000 bushels. The estimate is based on figures issued in the previous report of the association last October. The total wheat output for marketing is estimated at present to total 37,036,000 bushels.

Canada Not Behind In Health Legislation

In Some Respects Ahead of Other Countries Says Doctor

Canada is not one bit behind other countries in legislation for public health. In some respects it is ahead of other countries, Dr. Alexander Primrose, chairman of the Council of the Canadian Medical Association told the gathering of medical men and women, which gathered at Ottawa for a three-day convention. About a hundred delegates were in attendance representing every province and every association which has to do with public health.

New Assembly Service

A new assembly service between Halifax and Boston and Queenstown will be inaugurated at once in order to accommodate the increased business between Canada and South Ireland, according to an announcement made by the White Star Dominion Line at Halifax.

Seed and Feed Analysis

Many Samples of Seed and Feed Analyzed at Government Laboratories

During the year ending March 31 last, in accordance with the report of the Dominion Minister of Agriculture for 1933-34, 41,791 samples of seed and feed were received and analyzed—the former for purity or germination and the latter for determination of ingredients. At the government laboratories conducted by the Dominion government, of the whole 2,654 samples were treated at the laboratory opened in Quebec last January, 14,892 at Ottawa, 3,331 at Toronto, 5,965 at Winnipeg, and 7,759 at Calgary. These samples come under the head of "trade," referring to samples of seed sent to by merchants, farmers and institutions; "customs," referring to samples of seed taken from imported shipments by customs officials; "official," including all feeds, and in addition, conditions and tonics sent by farmers, merchants, and others who desire to know their approximate composition and value, and "investigation," comprising all work of an experimental nature.

Canada's Minerals Barely Touched

Surprising That More Canadians Do Not Realize This

Dr. Thomas Thomas-Johnson says that "It must have come as a revelation to the ordinary British citizen to be told that Canada is the second largest gold producing, and the third largest silver producing country in the world. His eyes must have opened still wider when he learned that the Dominion's resources of thousands of miles of mineralized strata have barely been scratched. But it is also a matter of some surprise that more Canadians do not cherish for their share a living mine."—Kingston Standard.

A Queer Cleaner

Snapping Turtle Used to Clear Clogged Sewer Pipes

A "western city" has been using a snapping turtle to "clean out sewer pipes that had become clogged. A cord more than three hundred feet long was tied to the turtle's tail, and the turtle was placed in one end of the pipe. It started off at a trot, and toward the other end three blocks away. When it got there some two hours later the cord was still attached to its tail. Men, who were waiting at one fastened a scraper to the cord, with which the pipe was soon cleared.

On St. Patrick's Day

A health to St. Patrick and confusion to the snakes need not be drunk in water on next March 17, the Fred Starr senate has decided, according to a dispatch from Dublin. By a majority of one vote, the senate defeated a bill which would have closed all saloons on St. Patrick's day.

Good neighbors and a good digestion are similar. You are never aware of them.

Supremacy Of Marquis Wheat Over All Other Varieties Still Remains Unchallenged

Manitoba Bee Industry

Excellent Crop of Honey Brings Big Returns

That there had been an increase of some 1,000 per cent in the number of beekeepers in Manitoba during the past five years was the statement made by Dr. H. J. Merkley, at a luncheon in Winnipeg, today, as he spoke the bee industry in the province. Formerly Manitoba had been spending as much as half a million dollars annually for the purchase of honey from outside the province. Now this was not the case, honey being exported instead. This meant that not only was the half million dollars saved, but outside money was brought into Manitoba.

This year's crop of honey had been excellent in the west and north districts of the province, and generally where there was sweet clover. One of the best returns was reported from the St. Joseph's orphanage at Oshawa, where 21,000 pounds were taken from 108 hives. The largest report from any individual was that submitted by a little girl at Carman who got 200 pounds of honey from two pounds of bees purchased last spring. Much assistance was given the bee industry by the Manitoba Agricultural College, Dr. Merkley said.

Reduced Rate On Cattle

Hope To Lower Rate By \$15 A Head To Get Steers Overseas

Many very hopeful that freight rates on cattle from Canada to Great Britain will be reduced before long, so that exporters will be enabled to send over the light type of steer that is already in favor on the market," stated Dr. S. H. Grisdale, deputy minister of agriculture, during an interview in Winnipeg.

Mr. Grisdale said negotiations looking toward a reduced rate had been carried with the British government, and he declared that if the rate could be brought to \$15 per head, it would mean a great deal to the cattle trade and soon result in the establishment of a market for steers ranging from 200 to 1,000 pounds.

German Politics Not Profitable

Being a member of the German Reichstag, or parliament, is not a very lucrative position. The delegates are paid \$14 a month, which is one-quarter the salary of cabinet ministers. But the German parliamentarian enjoys a free railroad travel throughout the republic in first-class compartment.

Find Rare Fossils

Discovery of limestone ledges in Missouri, which are rich fossils of the Silurian age, have made possible study of the fauna of that long distant time, according to John H. Ball of the geology department of Northwestern University.

The island of Mikalima, in the Bay of Hiroshima, Japan, is notable for its deer and the absence of dogs.

Since Marquis wheat was first introduced, a good many growers and breeders have been making selections from it with a view to producing, if possible, an improved strain. From results obtained so far it seems quite clear that differences of greater or lesser importance actually exist. Before it will be possible to recommend one strain of Marquis over another, several years testing will be necessary, however.

While certain new varieties had failed to replace Marquis in the west, yet in these varieties have been found, further, the supremacy of Marquis as a general variety for most parts of Western Canada will remain unchallenged. At the present time, it is estimated that approximately 90 per cent of all the spring wheat grown in Western Canada consists of the above variety, while in the United States statisticians claim that approximately 70 per cent of the spring wheat grown in that country is devoted to the production of this variety.

Canadian Farmer Has Advantage

Is Better Off Than Neighbor to the South

"In spite of certain real difficulties with which he is faced today, the Canadian farmer enjoys certain clear advantages over his brother in the United States," stated Hon. Thomas A. Low, minister of trade and commerce.

Low pointed out an advantage which the Canadian farmer has over the farmer of the U.S.A. farms are owned by tenants, as against only eight per cent in Canada. Ownership gives the occupant a more permanent interest in the land and, consequently, has any form of lease. At present, there are 711,000 farms in Canada, as compared with 6,448,343 in the United States. The average farm in the United States is 160 acres, while in Canada the average is 384 acres. While 198 acres represent the average size in this country, but the value is in the inverse proportion, the Canadian holding being valued at \$2,523.00, as against \$1,110.00 in the United States. On the basis of all farms, the average expenditure for labor was \$181 in this country and \$120 on the other side of the boundary.

Unemployment Insurance

Only Way to Protect Workers From Periodical Distress

However much, in the main, they may be improved, there will still always be the ups and downs, or the ebbs and flows, which lead to unemployment. Few responsible people can have any doubt what is the proper method of dealing with this recurrent difficulty. The only remedy is a thorough and inclusive system of insurance. Without this, distress must periodically recur, and there can be no sense of security for the worker. —London Daily Chronicle.

For the New Year

"Let me be a little kinder, let me be a little blinder, to the faults of these about me; let me praise a little more, let me be, when I am weary, just a little bit more cheerful; let me serve a little better; let me be a little more generous. Let me be a little braver when temptation bids me waver; let me strive a little harder to be all that I should be; let me be a little kinder with the bridle that is weaker; let me think more of my neighbor and a little less of myself." —Selected.

Hold Up Restaurant

Five masked bandits held up a restaurant in Berlin and ordered the best meal in the menu at the point of guns. They took the doors behind them and held all the waiters, cooks and other patrons captive until they had finished eating—dining by force.

Stock Game Sanctuary

It is the intention of the department of game and fisheries of the province of Ontario to stock the lake game sanctuary east of Port Arthur with buffalo and pheasants, it was announced by Frank H. Keeler, M.L.A., secretary of the Northern Ontario.

The "Princess Marguerite" after her successful launch at Chatham, recently. Hon. Marguerite St. Laurent, daughter of the late chairman of the Canadian launch, is seen in the vessel from the way out. At the end of the christening, it being clear the Atlantic for performing this office. With a view to the "Princess Marguerite" the new ship-building company will be placed in the Vancouver-Victoria and New Brunswick of the Canadian launch early in 1935.

THE SEASON'S GREETINGS.

Mr Nelson Allen, Edmon-
ton, is a guest th week of
Mr Giles Clarke.

Miss Maisie Blenken has
resigned as teacher at Gover-
neur school.

The dance at Schwindt's
Hall, Spruce Grove, on Friday
night last given by Mr Logan
was a very successful affair.

Spruce Grove M.D. Coun-
cillors held their regular
monthly meeting on Monday
last, when routine business
was transacted.

Paid trappers' licenses are
awaiting at The Sun office for
Peter Getzinger and Harry
Chausen.

About \$16,000 were taken
in at the Government Liqueur
Store in Edmonton the day
before Christmas.

The largest turkey market-
ed in Ontario this season was
delivered in Paisley last week
by Dan McGillivray of Bruce
Township. The turkey weigh-
ed 45 lbs. live and 36 lbs.
dressed.

Gillette gold plated razors
and box \$2; silver plated Gil-
lette razors at 50c, at Stony
Plain Pharmacy.

Tires and tubes vulcanised
and repaired at Stony Plain
Garage.

Sporting Notes.

Stony's hockey team play-
ed at the Grove on Christmas
Day with the Groxys bunch.
The play took place on the
new rink, and was very good,
altho the Grove team was
weakened by the absence of
two of its players. The score:
Stony 7, Grove 2. Stony's
line-up—Heichen, J. K. Mil-
ler, Umbach, Alt, H. Treit,
Jac Schoepp.

Stanley Moyer has been
appointed janitor at the skat-
ing and curling rink, and Paul
Klapper secured the contract
for cleaning the snow from
the skating area.

Stony's hockey team plays
at the Grove today, and Capt.
Umbach expects his team to
win as easily as on Christmas
day. Hopes are entertained
weather conditions will allow
the manager to be present at
the game.

The Ping pong Club held a
meeting Monday in Cobweb
Hall and elected Sandy Mac-
donald representative to the
Athletic Ass'n.

Seed Grain Prices Set

The prices at which seed
will be sold from the Provin-
cial seed cleaning plant at
Edmonton on behalf of the
seed growers patronising the
plant, have been set as fol-
lows:

Marquis and Ruby seed
wheat, 1st generation, \$1.25
above the current. Edmonton
street price for No. 1 at time
of sale. 2d generation 80c
above; 3d generation 60 cents;
4th generation 50c above.

Prices for seed oats will be
set at the annual meeting of
Alberta Seed Growers at Cal-
gary Jan. 20. Those wishing
to purchase seed oats may
send in their applications now
to the plant at Edmonton and
they will be protected in the
order of their applications
when prices are set.

Holborn News.

Miss Gladys Williams has
returned to Edmonton to re-
sume her duties at the Mis-
sion Hospital, after spend-
ing a short holiday at the
home of her parents, Mr and
Mrs W C Williams.

Mr Charles Williams re-
turned home for Christmas
from the Royal Alexandra
Hospital, where he had been
a patient for the previous four
months.

Miss Elma Burger of Ed-
monton, is spending a short
holiday at the home of her
parents.

Mr Percy Davidson, for-
merly of Holborn, is recover-
ing from an operation which
he underwent at High River
a week ago.

Owing to the severe cold
weather, the Burger brothers
were unable to finish sawing
wood for Mr C Williams.

O. S. A. Seed Fair

A prize list of the Third
O. S. A. Experimental Union
Seed Fair, which is to be
held at the Olds Agricultural
School on Monday Jan. 25th,
1925, has been received.

The purpose of the Fair is
to stimulate the production
of good seed grain. This it
is felt, will enable graduates
of the Old School and any
others who take part in an
undertaking of the kind to
reap considerable financial
benefit, and derive pleasure
and satisfaction from their
efforts.

Here and There

Of the 20,000 harvesters who
went west this summer over Cana-
dian Pacific lines, 14,000 are known
to have returned east, according
to C. B. Foster, Passenger Traffic
Manager, Canadian Pacific Rail-
way, and it is thought that many
others have returned, while several
thousand are believed to have ac-
cepted positions in the west for the
winter.

An indication of the increase in
the value of effects being brought
into Canada by settlers from the
United States is shown in the lat-
est report to the Department of
Trade and Commerce. From April
1 to September 30, effects so clas-
sified were valued at \$3,129,333, as
compared with \$2,696,467 in the
same period last year, an increase
of \$462,872.

A feature which will add greatly
to the attractions of Vancouver,
B.C., as a winter resort, to say
nothing of increasing its summer
attractions, will be the new golf
course to be laid out there at a cost
of \$120,000, exclusive of land. Work
on the course will commence next
spring. Fees will be merely nom-
inal, fifty cents being charged for
an 18-hole round, \$2.50 for a
month's play and \$20 for a year.
Play will be open to any member
of the public.

Immigrants entering Canada dur-
ing the 12 months ending October
31, 1924, totalled 134,189, as com-
pared with 126,745 in the corre-
sponding period of 1923-1924, ac-
cording to the Department of Im-
migration and Colonization. These
figures are more encouraging in
view of the fact that the number of
Canadians emigrating to the
United States has to some extent
decreased, while the number return-
ing from the United States is on
the increase, according to the de-
partment.

On November 24th, Hon. Mar-
guerite Shaughnessy, daughter of
the late Lord Shaughnessy, chair-
man of the Canadian Pacific Rail-
way, performed the launching and
christening ceremony at the Clyde-
bank yards of John Brown and Co,
when the new Canadian Pacific
S.S. Princess Marguerite, named in
her honor, was slipped into the
water. The Princess Marguerite is
the second of the two vessels re-
cently ordered by the Canadian Pa-
cific for the company's British Col-
umbia coastal service.

An entirely new service between
Montreal, Toronto and Winnipeg,
operating on the fastest schedule
yet established for these cities, was
instituted by the Canadian Pacific
Railway on December 4. The new
train, leaving Montreal at 6:15 p.m.
daily, and Toronto at 9:45 p.m.
daily, reaches Winnipeg at 9 a.m.,
39 hours, 45 minutes after leaving
Montreal and 36 hours 15 minutes
after leaving Toronto. Express
shippers are especially benefited,
as shipments reach the terminal
cities in time for delivery on the
second day after leaving, instead of
on the third as formerly. Passen-
gers gain a business day and earlier
connections for more distant points,
on reaching their destinations. As
the eastbound train of this service
connects direct with the Frontenac
for Quebec city, passengers and ex-
press bount for that point also gain
greatly by reduced time.
